

Vipin Kumar

Power Platform Architect

Delhi, India | vipintyagi00@gmail.com | +91 88602 83720 | linkedin.com/in/viipiintyagi

SUMMARY

Power Platform Architect with 11+ years of experience designing and governing enterprise Microsoft 365 and Power Platform solutions. Specializes in Power Platform governance, Center of Excellence (CoE) setup, citizen developer enablement, and DevOps-driven ALM across Power Platform Pipelines and Azure DevOps. Proven track record modernizing legacy SharePoint and InfoPath platforms into secure, scalable Dataverse and Power Apps architectures. Adept at partnering with global stakeholders to balance innovation with governance, security, and compliance.

SKILLS

Architecture & Platforms: Solution Architecture, Microsoft 365 Architecture, Power Platform Architecture, Enterprise Application Design, SharePoint Architecture (Online, 2013, 2010), Legacy Modernization & Cloud Migration

Power Platform Governance: Power Platform Governance, Center of Excellence (CoE), Citizen Developer Enablement, DLP Policies, Environment Strategy, Agent Lifecycle Governance

Microsoft Power Platform: Power Apps (Canvas & Model-Driven), Power Automate (Enterprise Workflow Design), Microsoft Dataverse (Data Modelling & Security), Copilot Studio

SharePoint & Integration: SharePoint Online, SharePoint Designer, REST APIs, CSOM, JSOM, SSOM, PnP, CAML, InfoPath to Power Apps Modernization

Automation & DevOps: Power Platform Pipelines (Governed ALM), Azure DevOps Pipelines (CI/CD), Azure Automation, PnP PowerShell, PowerShell Scripting, GitHub Integration, Environment Promotion Controls

Development & Data: C#, ASP.NET, JavaScript, HTML, CSS, jQuery, Azure SQL DB, SQL Server

Tools: Visual Studio, VS Code, Sharegate, SharePoint Migration Tool, Pac CLI, XRM Toolbox

EXPERIENCE

Power Platform Architect

Capgemini India | Apr 2024 – Present

Project: Allegis Group (Jun 2026 – Present)

Driving Power Platform governance and adoption maturity across the enterprise.

- **Power Platform Governance:** Defining and operationalizing enterprise Power Platform governance models, including environment strategy, DLP policies, and connector controls.
- **Center of Excellence (CoE):** Establishing a Power Platform Center of Excellence to standardize practices, drive adoption, and provide centralized oversight.
- **Citizen Developer Program:** Designing and launching a citizen developer enablement program with guardrails, training, and structured review processes to scale safe low-code delivery.
- **Team Maturity & Enablement:** Mentoring and upskilling the delivery team to mature Power Platform capabilities and engineering practices.
- **ALM & Pipelines:** Implementing governed deployment pipelines using Power Platform Pipelines and Azure DevOps for controlled, traceable releases across environments.

Project: ABB Cloud Transformation (Apr 2024 – May 2026)

Led digital transformation of a SharePoint 2010 ecosystem to modern Microsoft 365 and Power Platform solutions.

- Designed and led large-scale SharePoint 2010 to SharePoint Online migration strategies, ensuring zero business disruption and continuity of critical enterprise operations.
- Delivered 50+ InfoPath to Model-Driven Power Apps transformations, implementing enhanced UX, complex business rules, and Dataverse-based architectures.
- Architected and executed Nintex to Power Automate workflow migrations, achieving 40% process efficiency improvement and reduced operational overhead.
- Led and mentored a team of 15 developers, providing architectural guidance in Dataverse data modelling, advanced JavaScript customizations, and Power Platform development.
- Led the definition of Power Platform and Copilot Studio governance models, ensuring secure, compliant adoption aligned with enterprise standards.
- Designed and enforced Data Loss Prevention (DLP) policies addressing AI, Copilot, and Power Platform scenarios, defining connector usage and data boundaries.
- Established standardized environment templates aligned to development, testing, and production lifecycles for Power Platform and Copilot workloads.
- Implemented CI/CD pipelines using Azure DevOps and integrated Power Platform Pipelines with governance policies, enabling controlled deployments and traceability across environments.
- Coordinated governance and ALM delivery between India-based implementation teams and US-based architects, ensuring consistency and adherence to standards.
- Delivered architecture and governance workshops covering Copilot Studio fundamentals, security, controls, ALM, and citizen developer safeguards.

Senior Consultant / Manager (SharePoint & Power Apps)

Capgemini India | Nov 2020 – Mar 2024

Project: H1 Enterprise Cloud Migration

- Led enterprise-wide migration of legacy on-premises applications and business data to the Microsoft 365 cloud platform.
- Architected and executed migration of 500+ GB of critical data; automated migrations using PowerShell, reducing execution time by 60%.
- Designed Power Automate workflows for complex business processes and modernized legacy forms using Power Apps, improving user productivity by 45% and enabling mobile access.

Project: CIM (Customer Information Management)

- Architected a scalable field data collection solution using Power Apps, supporting multi-region field operations.
- Designed offline-enabled canvas apps, multi-level approval workflows, and real-time data synchronization with Azure SQL Database.
- Implemented enterprise security, data protection controls, and GDPR-compliant access models.

Application Development Senior Analyst

Accenture | Nov 2019 – Oct 2020

Project: TOS (Team to Onboard)

- Designed and delivered an onboarding progress tracking solution using Power Apps canvas applications.
- Architected and maintained Azure SQL Database schemas and data access layers.
- Developed custom connectors for secure system integration and implemented role-based access control aligned with enterprise security standards.

Project: IM Legacy SharePoint Migration

- Led end-to-end migration of SharePoint 2010 environments to SharePoint Online.

- Performed pre-migration assessments, designed migration strategy, and executed data migration using Sharegate.
- Automated migration activities using PowerShell and conducted post-migration validation to ensure data integrity and application stability.

Software Engineer

HCL Technologies | Dec 2016 – Nov 2019

Project: NextGen App — CRM for centralized customer data management

- Architected end-to-end CRM solution using Power Apps Canvas and Azure SQL Database.
- Designed scalable data models, optimized database performance, and executed data migration with minimal downtime and zero data loss.

Project: GPC (Good Practices) — Enterprise best-practices management

- Designed application components and developed batch processing jobs and reusable user controls.
- Implemented structured review and approval workflows ensuring data accuracy, consistency, and high availability.

Project: AnR (Automation and Robotics) — Flow-based internal approval platform

- Designed Microsoft Dataverse (CDS) architecture and security model.
- Developed dynamic Power Apps canvas applications and automated document approval workflows, improving operational efficiency and compliance.

Jr. Software Engineer

Velocis Systems Pvt Ltd | Oct 2014 – Nov 2016

Project: OptiBolt — Standalone IT management product

- Developed and optimized Wi-Fi access management solutions, designed approval workflows, and ensured system performance and reliability.

Project: FMS (File Management System) — Document history and tracking

- Developed advanced forms and approval workflows, designed and implemented a custom Master Page, and performed manual testing to ensure functionality and user experience.

Project: Digital Workplace — Employee self-service application

- Used out-of-box features, developed task management solutions, created reusable workflows, and ensured system scalability and maintainability.

CERTIFICATIONS

- AZ-900: Microsoft Azure Fundamentals
- PL-900: Microsoft Power Platform Fundamentals
- PL-100: Microsoft Power Platform App Maker
- PL-400: Microsoft Power Platform Developer

EDUCATION

MCA (Master of Computer Applications), UTU — Jul 2014

BCA (Bachelor of Computer Applications), HNB University — Jun 2010
